

The Rotary Dream Team - India 2017

Program, Costs & Trip Application Form for US & Canada (Version 1.0)
International Project Lead: PDG Elias Thomas, D 7780 (Maine, USA)
Trip Coordinator D 5300: Past AG Linda Bertuzzi
Project Manager: Past Pres. Sanjiv Saran (RC Delhi Megapolis, D 3010, India)

Travellers down the ages have tried to discover the Essence of India. To many, it has remained an enigmatic kaleidoscope. To some it has revealed ancient, abiding, universal Truths. None could remain untouched by the epic proportions of its size, its artistic heritage, or the wealth and variety of its vibrant cultures.

Since 2008, the Rotary Dream Teams come to India every year to work hands –on with humanitarian projects in the heart of India. Before or after the project, they also take a short holiday to enjoy a slice of India’s many contrasting cultural flavors and landscapes.

In 2017, our project is located in the Indian state of Punjab. It presents a unique experience for those who like to **Make a Difference**, like the Outdoors, and cherish close interaction with distant cultures.

Project Highlights in 2017

We will participate in a **Polio NID** (National Immunization Day) in the Mewat district (Haryana), where the latest polio case had been reported as recently as January 2010.

We will not only administer the drops to village children, but shall also lead a rally through the village streets to advertise how critical it is for parents to bring their children for the drops, every NID, every six weeks.

Program, Costs & Trip Application Form for US & Canada (Version 1.0)
International Project Lead: PDG Elias Thomas, D 7780 (Maine, USA)
Trip Coordinator D 5300: Past AG Linda Bertuzzi
Project Manager: Past Pres. Sanjiv Saran (RC Delhi Megapolis, D 3010, India)

Project Highlights (cont).

In the heart of rural India, we will work with our hands as part of the labour force to build two check dams 1km apart, near the Sikh religious centre of Anandpur Sahib in the India state of Punjab. The project will be funded by a Global Grant from the Rotary Foundation. The project will have a far reaching, long-term and sustainable impact on the welfare of an impoverished but colourful and vibrant community. The dams will help surrounding villages to increase their annual crop yield by 50 percent, by

trapping the rain water that gushes down from the hills in the monsoon months but rushes away without benefiting the local population.

The dams will prevent aquifer degradation and surface water depletion, and this in turn will lead to:

- Recharge of ground water and lift water levels in the wells.
- Make drinking water available to community during summer months from bore-wells in their own villages that are currently dry.
- Free women and girl-children from the day long drudgery of fetching

water from distant wells, thus freeing them up to benefit from trade-oriented education.

- Make drinking water available to cattle and other animals.
- Assure irrigation in summer months and thus increase the annual crops from 1 per year to 3 crops per year, including vegetable crops that are more lucrative but also water intensive.
- Additional income from increased crops would reduce the need to take male children out of school and send them out to earn money for the family kitchen.

The Rotary Dream Team - India 2017

Program, Costs & Trip Application Form for US & Canada (Version 1.0)
International Project Lead: PDG Elias Thomas, D 7780 (Maine, USA)
Trip Coordinator D 5300: Past AG Linda Bertuzzi
Project Manager: Past Pres. Sanjiv Saran (RC Delhi Megapolis, D 3010, India)

This is a unique opportunity to live and work with the real, Eternal India: rustic, curious, warmly welcoming, a collage of timeless pastoral scenes. The level of physical fitness required to enjoy this activity is no more than that of a normally active person. Since we will be working in tandem with local foremen and labour teams, prior experience or expertise in construction is not required. We

will stay near the project site in an exclusive tented camp specially put up for our team. The tents are in the Swiss Cottage style, with two beds and an attached WC (western style with flush), shower, and washbasin, with running hot & cold water.

What do you have to do to join the Trip ?

- Read the following pages carefully, and print the Trip Application Form (pages 18 and 19).
- Email the completed form as a scanned attachment to Inbound@hipoints.com. We will study any special requirements that you may have and will then mail our invoice and payment directions by wire transfer or credit -card, along with visa application instructions.
- Send payment of at least 50% of your trip cost within 2 weeks of receiving the invoice, by bank wire transfer or credit-card.
- Apply for your Indian visa.
- Send your balance payment by bank wire transfer or credit-card latest by **September 30, 2016**

- Camera fee or any item not specifically listed above.

More about the places we will visit

Tour A

Delhi: At the time when Bombay and Madras were just being established, Delhi had already been the capital of an empire for 500 years past. Over the centuries, no fewer than eight cities have been built side by side on this site.

The city as it stands today has been built by Hindu, Muslim and British builders, and in a few minutes you can be transported from the neo-classical architecture of the elegant garden city of New Delhi to the narrow, twisting lanes that surround Chandni-Chowk in the old city.

The Rotary Dream Team - India 2017

The fortifications surrounding Jaipur give it a medieval atmosphere. The delicate honey-comb design of the 'Palace of Winds' glows in the light of the setting sun. Quaint bazaars thrive around this edifice. High above the city, the towers and domes of the Amber Palace are reminiscent of scenes from a fairy tale. Indeed, Jaipur embodies all that you may have heard about the pomp and pageantry of India, its Maharajahs and their fabulous palaces, and the marvellous, colourful drama of Life on its bustling streets.

We shall ascend to the Amber Palace atop gaily decorated elephants, as did the Maharajah's of yore. Within the fort walls lies an assortment of buildings famous for their intricate mirror inlays - the Hall of Mirrors, Kali's Temple, palaces with latticed windows and beautifully sculpted arches and pillars.

The City Palace is still the residence of the Jaipur family, and its museum displays a fabulous collection of paintings, carpets, jewels and arms. We will also visit the Jantar Mantar (Royal Observatory), and the Hawa Mahal, or "Palace of the Winds". This is a multi-storied, intricately latticed facade of pink sandstone, designed for the pleasures of the ladies of the royal court. From here they could look out upon the quaint bazaars that still thrive around the palace, without exposing themselves to the commoners. Later, we shall explore the same colourful bazaars on foot. Here we may have memorable encounters with the descendants of those

“commoners”, many still living in their ancestral “havelis” along the main market street. The sheer variety of the items that are sold off the street is fascinating, ranging from the mundane to the exotic, or even the simply baffling.

The famous **Ranthambhore Tiger Reserve** is spread over an estimated area of 250 sq miles. Steep crags embrace a network of lakes and rivers, and atop one of these hills, is the impressive Ranthambore Fort, built in the 10th

century. The terrain fluctuates between impregnable forests and open bush land. The forest is the typically dry deciduous type. Numerous lakes in this forest attract the tiger population. Old crumbling walls, ruined pavilions, wells, and other ancient structures stand witness to the region’s glorious past. The reserve is also home to panthers, marsh crocodiles, hyenas, jungle cats, sloth bears, sambar deer, chital & chinkara deer, and nilgai (antelope). Bird life includes black storks, painted storks, quail, Bonelli’s eagles, crested serpent eagles and spur fowl.

Agra (Taj Mahal): Back in the north of India, the Taj Mahal is a magnificent monument to an emperor’s love for his queen. A colossal, perfectly proportioned mass of marble, the Taj Mahal is literally a jewel. It was fashioned over 17 years by 20,000 craftsmen & labourers. From a distance, it seems to float, like a fantastic mirage, upon the banks of the River Yamuna.

Tour B:

DARJEELING (apx.2134 m): The mighty Kanchenjunga (8586 m / 28000 ft), third highest mountain in the world, towers

above this charming town like a gigantic ship floating upon a sea of clouds. In the distance, Mt.Everest retains its aloofness. The town itself is a typical Indian "hill-station".

There is "The Mall", of course, a promenade with "fashionable" stores alongside and Kanchenjunga playing hide and seek in the skies above. The lower regions of the town are teeming with colourful tribesmen trading their products in the busy market. The town is surrounded by picturesque tea-plantations.

Trip Coordinator D 5300: Past AG Linda Bertuzzi
Project Manager: Past Pres. Sanjiv Saran (RC Delhi Megapolis, D 3010, India)

The crowning glory of the erstwhile kingdom of Sikkim is Mt. Khangchendzonga, the third highest mountain in the world. With magnificent snow and ice scenery it is often regarded as the undisputed monarch among the peaks of the world. But for the Sikkimese Khangchendzonga is much more than a mountain and is revered as the abode of their guardian deity Dzo-nga. Sikkim shares its border with Nepal in the west and Bhutan in the east, with the Tibetan

plateau rising from its northern border. It was once a Himalayan monarchy and part of the fabled Silk Route to China. Its merger with India in 1975 has offered a window to the world to discover the treasures of this hidden land.

Martam Retreat is located in the tranquil countryside village of Martam in East Sikkim, 29 kms from Sikkim's capital Gangtok. Surrounded by the virgin forests of the Fambongla Wildlife Sanctuary and facing the majestic Nathula range, we can enjoy nature at its best, breathing clean fresh air while taking in the spectacular views. A 10min hike up the hill just above the resort takes us to a tiny monastery called Mani Lhakhang. The view from here is beautiful and you can see the Tinjure Hills looming right behind you and in front is

sprawled the charming paddy fields that make up Martam. In the monastery, there are Lepcha manuscripts along with palm-leaf ones from Bengal and Orissa, coins and stamps, relics of Ashokan

monks and a treasure trove of Tibetan books. Down towards the village, there are paddy fields all over in terraced gardens, and small houses in between, and a narrow road meandering through the village at a gentle slope. You can clearly see Rumtek Monastery across the paddy fields on the other side of the small valley.

Rumtek Monastery is the seat of Karmapa who heads the Karma - Kagyupa sect of Tibetan Buddhism. The earlier monastery is situated on the lower parts of the hill and after the Chinese aggression the 16th Gyalwa Karmapa after coming back from Tibet built the new monastery on the top of the hill. Built in 1960s the monastery is said to be the biggest monastery in Sikkim which has its own school to impart teachings in Tibetan and various aspects of Tibetan Buddhism.

biggest monastery in Sikkim which has its own school to impart teachings

Gangtok is the capital of the northern Indian state of Sikkim. Established as a Buddhist pilgrimage site in the 1840s, the city became capital of an independent monarchy after British rule ended, but joined India in 1975. Today, it remains a Tibetan Buddhist center and a base for hikers organizing permits and transport for treks through Sikkim's Himalayan mountain ranges.

More about the Dam Project: The Anandpur Sahib Wala Dams – Feb 2017

BACKGROUND

The state of Punjab is located in the Northern part of India. It is primarily an agrarian state with maximum contribution from agriculture sector. The state has been witnessing severe water scarcity in the last few years. Punjab, also known as the land of five rivers, is staring at a dark future on the water front; the ground water level is fast depleting. Bore wells yield water at 300 to 400 feet, where earlier the ground water levels used to be 70—100 feet. Every year, the level goes down by 10 feet. The situation is very alarming¹, as it is directly affecting the people in the state, who are mainly dependent on agriculture and its allied activities.

Ropar district is located in the eastern part of the Punjab State. Administratively the new Ropar district is divided into four tehsils: Rupnagar, Chamkaur Sahib, Anandpur Sahib and Nangal. Agriculture is also the main source of the economy here. Depleting groundwater has led to an increasing demand for water to meet the agricultural and household needs. The traditional ponds system of Punjab, including those in Ropar are now lying in ruins. There is a need to harvest the rain water and increase the underground water levels.

We will participate in the construction of two check dams at a distance of 1km from each other, to cover the entire belt in this location. The check dams will be constructed on a seasonal water stream that will cover an area of approximately 550 meters and will directly benefit 100 acres of agriculture area.

PROPOSED LOCATION

State: Punjab
District: Rupnagar District
Tehsil: Anandpur Sahib
Village: Jhajjar
Population: 1500
Total Households: 180
Check dam Names: Anandpur Sahib and Anandpur Sahib Jhajar
